THE INTELLIGENCER.

WHEELING, MARCH 7, 1900.

Red Ash Mine Disaster.

It has been many years since West Virgina has been shocked by such a mne disaster as that which occurred at the Red Ash mine in Fayette county yesterday. From the reports at hand at this hour it is not known just what forces operated to cause the explosion which resulted in the loss of life and great destruction of property. The state mine officials give the mine a good name for ventilation and the employ-ment of the best methods for safeguarding the lives of the miners. Theories are advanced, but they prove noth-

The thing that is beyond conjecture however, is that the miner's occupation is the most dangerous of the various industrial employments, for when the earth caves on him or the deadly fire damp or the insidious gas lets go he is paculiarly helpless and almost entirely shut off from timely aid and succor. Even the best regulated mine is always at the mercy of the mysterious work ings of nature which have not yet been brought under the control of man.

## The Social Demograts.

The national convention of the Social Democratic party begin its sessions at Indianapolis yesterday, with eleven states represented by delegates. The demands of this party are an iridescent dream of the most uptoplan character. There is some talk of their fusion with the Socialist Labor party, which is equally impracticable in its belief and ill-assorted principles. Eugene V. Debs, than whom there is no greater disturbe of tranquility and law, is spoken of as the presidential candidate of the con-vention, and it is asserted semi-officially that John B. Harrman, a Pacific coast agitator, will withdraw in his favor. Debs, not long ago, took occa-sion to declare that he would not accept a political nomination of any kind this year. The mind of a man, however, that claims that the present prosperity of the country is "a ghastly lie," is scarcely reliable enough to be de-

The Middle-of-the-Road Populista who seconded from the party at Lincoln, Nebraska, and called a separate convention, and who are opposed to sinking their identity by an alliance with the Bryan Democracy, are said to be flirting with the Social Democrats with a view to fusion, but so far they have

met with small encouragement.

The object sought to be attained by the Social Democrats is the establishment of a co-operative commonwealth which means the collective ownership of all means of production and distribution. To accomplish this, the platform of the party will declare for a revision of the federal constitution, public ownership of all industries controlled by trusts, railroads, telegraph, telephone water works, electric lights and legislation which will be favorable to the laboring masses.

We do not see how the laboring masses are to be benefited by such a wholesale revolution of existing affairs. The appeal of the Social Democrats is the veriest rot and the dying gasp of the est pernicious demagogy extant, Certainly, the intelligent class of workingen cannot be deluded by such chimer

## The Flurry in Cotton.

The recent remarkable advance in cotton at Liverpool has thrown that market into a state of feverish excitament, which has been the cause of dis-tributing millions of dollars throughout the south. While cotton goods are active and higher their rise has by no means kept pace with the increase in price of the raw material. The chief factors in the enormous demand of Great Britain and the continental countries are that none of them possess its usual amount of cotton; also the knowledge that the crop in this country the past year is short at least 2,000,000 bales, and that

the Indian crop is greatly reduced.

The Wool and Cotton Reporter com-

menting on the situation says: "Fortunately the cotton which this country is now losing is not a serious matter, for the American mills as a whole are very well stocked. The northern mills, with the possible excep-tion of those in Fall River, are probably stocked with enough cotton to last then The mills are consuming more of the staple than was ever before many that they will have to re-enter the market earlier than usual this year, an anticipation of future requirements. When they do, if the present level of bed.

"No," we thought it murmured, mournfully. "Not Father of Waters! Second Cousin, say!"

All the while the Chicago drainage canal rippled mockingly over its rocky bed.

values is sustained, they will find that higher than when they last purchased the bulk of their supplies.

One result of existing conditions will be seen undoubtedly in an increased acreage of cotton in the south this year. But this does not necessarily mean that there will be a correspondingly in-creased yield. The crop will depend upon weather conditions during the summer and fall. During the past year, as we have shown, there has been a greatly reduced yield of cotton, although the acreage was only a trifle smaller than that of the previous year. But weather conditions were extremely unfavorable, the big overflow in the Bra-zos valley alone reducing the yield by about 500,000 bales."

Drinking in the Philippines.

The everlasting Pettigrew is on a new tack. He has offered a resolution, which was adopted by the senate, calling upon the President for a statement as to the number of saloons established in Manila since the date of American occupation, by whom they are conducted, the nationality of their patrons and what kind of liquors are dispensed therein.

No one professes to know why the ever disturbing Dakotan wants this information, or what use he intends to make of it, except to make some extraneous application of it to the ad-ministration which he has so bitterly and improfitably assailed.

Perhaps he has taken his one from the

prohibition papers, whose charges have been notoriously unfair and unreliable. The Washington correspondent of the Chicago Record, noting the reiterated statements in prohibition papers about the prevalence of drunkenness in Manila, obtained the following official fig ures for the shipment of intoxicants to the Philippnes last year: Total value of all malt liquors, wines and whisky, \$268,966. Of the amount of whisky shipped there were only a little over 43,000 proof gallons. "These figures," says the New York Tribune, "throw a curious light on the assertion of one prohibitionist editor that a single Kentucky distillery shipped 5,000 barrels of whisky to the Philippines last November, a statement that has furnished the text for several heated sermons on the drunkenness of American soldiers in the Philippines. But the statistics of temperance people are frequently characterized by intemperance. For instance not long ago a Michigan clergyman de-cleared that "several million dollars worth of American whisky' was ship-ped to the Congo Valley last December, the fact being that the total exportation of whisky in December was 16,371 gal-lons, valued at \$22,775, and that not a single barrel was consigned to the Con-

go Valley."

But further light on the question comes from another source. The Rev. Dr. Charles Caleb Pierce (Episcopalian). an army chaplain in the Philippnes, who is making a short visit in this country. says that there has been no more drunkenness among the soldiers in the Philippines than among the soldiers at home, and there is much less now than there was at first. Prohibition, he declares, would make matters worse, and not better. If the sale of liquors was prohibited in the Philippines the soldiers would drink the native gin, one of the most deadly and maddening

the soldiers would drink the native gin, one of the most deadly and maddening of all intoxicants. Dr. Pierce says:

When I first went to Manila the streets were lined from end to end with native shacks, at which this poisonous compound was peddled at the rate of one cent a glass. The natives take one drink and stop. They know they have enough, but our soldiers, ignorant of its character, and because of its low price, would take four or five drinks, which set them crasy. They were not used to it. They drank it as they would drink beer or American wines. This caused an appalling amount of drunkenness. But it did not continue long. The native drinking places were abolished and the sale of that vile stuff was forbidden. Then discharged soldiers began to open saloons and seil American beer, wines, whisky, etc., which the soldiers drank moderately and with the same results as in the United States. The establishment of these saloons is accepted by persons who are not familiar with the facts as evidence that drunkenness has increased, but they do not know, or neglect to explain, that half a dosen drinking places have been abolished for every one that has been opened, and to-day if the American saloons were abolished the soldiers would find means to furnish them somehow or another.

The New York Journal of Commerce

The New York Journal of Commerce in its last issue gives a very comprehensive history of the trust movement, showing the details of the creation of such organizations for the past fifty years. It says that "while every effort has been made to keep the record a conservative one, the result is nevertheless striking, showing as it does that during this period the aggregate capitalization of such co-operation exceeds the enormous total of \$4,000,000,000."

The fire loss of the United States and Canada in February was \$15,427,000. For the same month last year the total loss amounted to \$18,496,000, but that was an unusually disastrous month. The heavi-est fire during the last month, \$1,000,000, was at Newark, New Jersey, which has demoralized insurance rates in that city, and many companies doing hustness there will lose heavily for the

Senators Elkins and Thurston will take care of the speaking end of the proceedings of the convention of the Republican League of Clubs at Parkersburg to-morrow.

State Treasurer M. A. Kendall, has formally announced his candidacy for the congressional nomination in the Fourth district
